

CM Hand Chain Hoists

The CM Cyclone

- **Load Limiter Device**
- **Fully Enclosed Brake**
- **CM Five Year Warranty**

The CM Cyclone is a hand-operated chain hoist with capacities available between 500 pounds and six tons. The Cyclone has a patented Load Limiter overload protector as an option. The Load Limiter automatically protects against excessive overloads. The CM Cyclone chain hoist has a fully enclosed brake and patented Hoistaloy chain for durability and safety. The CM Cyclone chain hoist has fewer parts per unit than most competitors, meaning fewer failures and less downtime. The lifting wheel is forged, and the frame is aluminum casting for strength and light weight. In the manufacturing process, the CM Cyclone chain hoist has over seventy-five tests and inspections, including two load tests.

CM 622 Chain Hoist

The CM 622 chain hoist is an economical choice for those looking to purchase a chain hoist. The CM 622 chain hoist has a steel frame and hardened load chain for economy and durability. No adjustments are necessary when installing a CM 622 chain hoist. The enclosed housing allows outdoor use, and the Weston type load brake requires no lubrication. The chain wheel is equipped with anti-jam features standard, to prevent jamming common in other economy chain hoists.
